

Capacity: 1G/2G/4G is best

Format: FAT32

NOTICE: The update work will last 10 minutes, do not operate or power off the unit during the process.

Update Steps:

1. Download the RoadNav Android S160 firmware for your model
2. Extract and Copy the files into the SD card and insert the SD card into the GPS Slot (it must be this slot)
3. Power OFF your radio (turn car key to OFF position)
4. Wait about 5-10 minutes for SRC light to go OFF
5. Hold the SRC button and turn car key to ON position. You should hear beep beep (it beep twice)
6. Upgrade will start automatically.
7. After about 5 minutes a message at the bottom says Installation complete. **BUT, that's not the end of the upgrade.**
8. The radio screen goes black and beeps for 1 minute (this is normal)
9. After some more updates the "installation is complete please remove card"
10. Remove the SDcard and the radio automatically reboots.
