CODE 46.151

Using lead 382 to extend OEM wiring from buttons to new location

Ensure all wires are clear of the aperture. Slide the head unit back into the dash. Ensure that the guide knobs are lined up with the guide rails as shown.

514 02

Install the screw base by locating the screws from the display removal.

CODE 46.151

1

Reconnect the two Blue connectors to the airvent panel

2

Slide airvent panel back into the place.

3

Install New Relocation Panel . The panel is very tight to clip in place, you will need to clip the top hooks first then lower clips.
