

mitsubishi PAJERO 2014->

Compatible with double DIN devices

Place the white clips and the display panel, previously stored, on the supplied facia plate.

Take the left and right brackets and mount them on the AFT unit with the supplied screws. Connect all cables and, if necessary, the services bullets.

Fix the radio-frame and reassemble all the parts in the reverse order, doing all connections. Check the proper functioning of the whole system. Mount the facia plate on the dashboard.
