Option (BT0014):

Music connection FM-modulation

Basic components

- 01 Touch screen
- 02 Mounting angle
- 03 Display cable
- 04 Electronic box (CIB-Box)
- 05 Microphone
- 06 Stereo-audio plug (3.5mm)

Power supply / Hands-free connection

- 07 ISO - cable
- 08 ISOplus - cable
- 09 Standard cable (open lacing)*

Music connection

- 10 Cinch cable (Line-In / CD-changer)**
- 11 FM-Modulator (via antenna)

Accessories

- 12 iPod® - cable

*If the radio does not have a Tel-In input you have to order an external loudspeaker.

**According to the radio type an extension cinch cable is needed for the standard cinch cable as well as a radio adapter. These cables are available at any good stored assembly garage or specialist dealer.

(advice 1)
Some vehicles do not come with an IGNS connection. This line is not necessary for operation of BLUETOUGH®. In this case, BLUETOUGH® doesn't start automatically. Just touch the display for 1 second.

(advice 2)
Music via SD-card in planning.
