

Wiring diagram for CK3000 Evo

It is important to follow the wiring diagram for your vehicle. We would advise our customers to have the interface fitted by a professional. In this technical document, you will find all information for correctly install your MULTICAN interface.

Important: Usually the 12v ignition is supplied by MULTICAN unit.

- ① MULTICAN interface
- ② Keypad Adapter
- ③ Supply connections
- ④ Mute input
- ⑤ CAN Configuration

1

Connect the power cable of the MULTICAN interface to the 14-way connector of the MULTICAN interface.

2

Join the connector of the kit's control keypad to the connector on the interface's power cable.
Connect the LCD harness to the adapter.

3

Connect the MULTICAN interface's power cable to the Parrot control unit and to the power cable of the hands-free kit.

4

Connect the yellow mute wire of the MULTICAN interface:
- to the Parrot yellow mute wire
- and to the car stereo's mute input if applicable

Notes: If you don't know where your mute input is, see the usual guide of your radio or contact your dealer for having the correct position of mute input.

5

CAN Configuration BMW

The wires corresponding to the CAN protocol must be connected correctly to your car stereo's CAN information. It is important to follow the wiring diagram for your vehicle. We would advise our customers to have the interface fitted by a professional.
